SAPONE MARSIGLIA

Instructions for use

- Application with stainless steel trowel, paintbrush
 - Application of 1 or more coats according to needs
 - Ready to use; stir carefully before use
 - SAPONE MARSIGLIA can be used in one of the following ways:
 - as it is, by spreading a light layer of product with a plastic trowel, without exceeding, otherwise colours risk to alterate, especially light colours
 - in aqueous solution : in this case the product must be dissolved and diluted with lukewarm water pro-rata 25 parts of product and 75 parts of water. Using sponge and spreading the product uniformly
- In both cases, after drying the excess of product must be removed with a soft cloth; in this way the brightness of finishing will appear
- Temperature of application 5° - 35°C

Notes

The present technical chart has been written by Bericalce's experts and the indicated technical and scientific information have been tested in our own workshop.

Any responsibility regarding the results are due only to the method and conditions used during application of the product.

These indications are a valid support for testing the quality of the product in each specific case.
